1. Product Overview

MFT software can be bought as a single product or as a bundle. Unlike many competitors, MFT prices its core plans **per vehicle per month** rather than per user, so that a customer's cost grows with the size of the fleet and not with the number of dispatchers.

FleetPulse - Live Tracking and Telematics

- Real-time GPS location of vehicles, refreshed every **10 seconds** (after release 4.2).
- Driver behaviour scores: harsh braking, over-speeding, idling.
- Geofencing with instant alerts and 12 months of trip history.
- Works with 40+ GPS and fuel-sensor device brands.

RouteMind - Route Optimisation

- Plans multi-stop routes using traffic, delivery time windows and vehicle capacity.
- Re-optimises routes during the day when orders are added or cancelled.
- Typical customers see a 9-14% reduction in distance travelled.

ShipSense - Delivery ETA and Customer Notifications

- Machine-learning ETA predictions with an average error of under 12 minutes.
- Automatic SMS, WhatsApp and email updates to end customers.
- Branded tracking links without any app installation.

DockFlow - Warehouse Dock Scheduling

- Slot booking for loading and unloading docks, reducing truck waiting time.
- Detention-time reports that help negotiate with transporters.
- Priced per warehouse site rather than per vehicle.

FreightLedger - Freight Billing and Reconciliation

- Matches trip records with transporter invoices and flags mismatches.
- Automates detention, toll and fuel-surcharge calculations.
- Exports to Tally, SAP and Zoho Books.
