Release Notes and Product Roadmap

Product team | Covers releases 4.0 to 4.2 and plans for the next two quarters

About this dataset: Meridian Freight Technologies is a fictional company created for document retrieval, chunking, embedding, and Self-RAG evaluation. All people, email addresses, policies, product and service names, prices, and operational figures in this document are invented. Any resemblance to real organizations, persons, or products is purely coincidental. This document is not real policy, advice, or a commercial offer, and must not be relied on for any real-world decision.

1. Release Cadence

MFT ships a minor release **every two weeks** and a major release twice a year, in **January and July**. Critical security fixes are released outside this schedule within 72 hours of verification.

2. Release 4.2 (July 2026)

- **FleetPulse:** location refresh interval reduced from 30 seconds to **10 seconds** on all plans. The Launch plan previously refreshed every 60 seconds.
- **RouteMind:** new 'reverse logistics' mode for planning pickups of returned goods together with deliveries.
- **ShipSense:** WhatsApp notifications now support Hindi, Tamil, Marathi and Arabic templates.
- **FreightLedger:** automatic detection of duplicate invoices, using vehicle number, route and date.
- **Pricing:** Scale plan price changed from INR 720 to INR 780 per vehicle per month for new customers. Existing customers keep their old price until renewal.

3. Release 4.1 (January 2026)

- DockFlow introduced a mobile check-in screen for drivers arriving at the warehouse gate.
- Driver behaviour score now includes a 'night driving' factor for trips between 11 PM and 5 AM.
- API rate limit for Scale plan raised from 60 to 120 requests per minute.
- Dubai cloud region made available for UAE customers.

4. Release 4.0 (July 2025)

- Complete redesign of the dispatcher dashboard.
- Launch of FreightLedger and DockFlow as separate products.
- FleetPulse added support for temperature sensors used in cold-chain vehicles.

5. Known Limitations

- RouteMind supports a maximum of **250 stops per route** in a single optimisation run.
- ShipSense ETA accuracy drops in regions with poor mobile coverage; predictions then fall back to a rule-based model.
- FleetPulse does not currently support satellite tracking devices.
- Exports from FreightLedger are limited to 50,000 rows per file.

6. Roadmap (Planned, Not Committed)

Quarter	Planned item	Product
Q4 2026	Electric-vehicle charging-stop planning	RouteMind
Q4 2026	Driver mobile app with in-app navigation	FleetPulse
Q1 2027	Carbon-emission reports per trip and per customer	FleetPulse, FreightLedger
Q1 2027	Natural-language question box for dashboards	All products
Q2 2027	Support for satellite tracking devices	FleetPulse

Roadmap items are plans and may change. Customers should not make purchasing decisions based on unreleased features.
